## SIEMENS

## Data sheet

## 6GK7343-1CX10-0XE0

## product type designation

Communications processor CP 343-1 Lean for connection of SIMATIC S7-300 to Industrial Ethernet via TCP/IP and UDP, Multicast, SEND/RECEIVE with and without RFC1006, Fetch/ Write, S7 communication (server), PROFINET IO device integrated 2-port switch ERTEC 200, Module replacement without PG, SNMP diagnostics, initialization via LAN, 2x RJ45 connection for LAN with 10/100 Mbit/s

transfer rate	
transfer rate	
• at the 1st interface	10 100 Mbit/s
interfaces	
number of interfaces / according to Industrial Ethernet	2
number of electrical connections	
<ul> <li>at the 1st interface / according to Industrial Ethernet</li> </ul>	2
<ul> <li>for power supply</li> </ul>	1
type of electrical connection	
<ul> <li>of Industrial Ethernet interface</li> </ul>	RJ45 port
at the 1st interface / according to Industrial Ethernet	RJ45 port
type of electrical connection	
<ul> <li>for power supply</li> </ul>	2-pole plugable terminal block
supply voltage, current consumption, power loss	
type of voltage / of the supply voltage	DC
supply voltage / 1 / from backplane bus	5 V
supply voltage	24 V
supply voltage / external	24 V
supply voltage / external / at DC / rated value	24 V
relative positive tolerance / at DC / at 24 V	20 %
relative negative tolerance / at DC / at 24 V	15 %
consumed current	
<ul> <li>from backplane bus / at DC / at 5 V / typical</li> </ul>	0.2 A
<ul> <li>from external supply voltage / at DC / at 24 V / typical</li> </ul>	0.16 A
<ul> <li>from external supply voltage / at DC / at 24 V / maximum</li> </ul>	0.2 A
power loss [W]	5.8 W
ambient conditions	
ambient temperature	
<ul> <li>for vertical installation / during operation</li> </ul>	0 40 °C
<ul> <li>for horizontally arranged busbars / during operation</li> </ul>	0 60 °C
during storage	-40 +70 °C
during transport	-40 +70 °C
relative humidity	
<ul> <li>at 25 °C / without condensation / during operation / maximum</li> </ul>	95 %
protection class IP	IP20
design, dimensions and weights	
module format	Compact module S7-300 single width
width	40 mm

CP 343-1 Lean

height       125 mm         depth       120 mm         net weight       0.22 kg         fastening method       • 57-300 rail mounting         vest       Yes         performance data / open communication / by means of SEND/RECEIVE blocks / maximum       8         data volume       • as user data per ISO on TCP connection / for open communication / by means of SEND/RECEIVE blocks / maximum       8 Kibyte         • as user data per TCP connection / for open communication / by means of SEND/RECEIVE blocks / maximum       8 Kibyte         • as user data per TCP connection / for open communication / by means of SEND/RECEIVE blocks / maximum       8 Kibyte         • as user data per TCP connection / for open le communication / by means of SEND/RECEIVE blocks / maximum       8 Kibyte         • as user data per UDP connection / for open le communication / by means of SEND/RECEIVE blocks / maximum       8 Kibyte         • as user data per UDP connection / for open le communication / by means of SEND/RECEIVE blocks / maximum       8         rumber of fouriestion / as set DIP RECEIVE blocks / maximum       8         rumber of SIMATIC communication       1         rumber of SIMATIC communication / as server       Yes         performance data / multi-protocol mode       12         performance data / PROFINET IO controler       No         performance data / PROFINET IO device       Yes

security information								
Approvals / Certificates		that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
