RMCF / RMCP Series General Purpose Thick Film Standard Power and High-Power Chip Resistor

- RMCF standard power ratings
- RMCP high power ratings
- Nickel barrier terminations standard
- Power derating from 100% at 70°C to zero at +155°C
- RoHS compliant, REACH compliant, and halogen free
- AEC-Q200 compliant (except 01005 and 0201 sizes)
- For ultra-high power, see <u>RMCP-UP Series Thick Film Ultra High Power Chip Resistor</u>

	Performance Characteristics								
Test	Test Specifications	Test Conditions (JIS-C 5202)							
	± (2% + 0.1Ω)	2.5 x rated voltage for 5 seconds							
Short Time Overload	Jumper: Max 0.05Ω after test	0201 = 1 A 0402 / 0603 = 2.5 A 0805 / 1206 / 1210 / 2010 / 2512 = 5 A							
Dielectric Withstanding Voltage	No flashover or breakdown	100 VAC, 1 minute							
Resistance to Soldering Heat	± 1%	260 ± 5°C, for 10 seconds ± 0.5 seconds (Solder Bath)							
Solderability	95% coverage, minimum	$235 \pm 5^{\circ}$ C, for 2 seconds ± 0.5 seconds (Colophonium flux)							
Temperature Cycle	± (1% + 0.05Ω) Jumper (< 0.05Ω)	-65°C: 30 minutes 25°C: 2 to 3 minutes 155°C: 30 minutes 25°C: 2 to 3 minutes (5 Cycles)							
Load Life (Endurance)	1% and below: ± (1% + 0.05Ω) 2% and 5%: ± (3% + 0.1Ω) Value < 1Ω: ± (3% + 0.1Ω) Jumper: Max 0.1Ω after test.	70 ± 2°C, RCWV or max. working voltage whichever is less for 1000 hours with 1.5 hours "ON" and 0.5 hour "OFF"							
Voltage Coefficient	± 100 (ppm/V)	1/10 rated voltage for 3 seconds max. then rated voltage for 3 seconds max.							
Robustness of Termination	± (1% + 0.05Ω)	Bend of 2 mm for 5 ± 1 seconds							
Resistance to Solvent	1%: ± (0.5% + 0.05Ω) 5%: ± (0.5% + 0.05Ω) Jumper: Max. 0.05Ω after test	The tested resistor should be immersed into isopropyl alcohol of 20 to 25°C for 60 seconds. Then the resitor is left in the room for 48 hours.							
Damp Heat with Load	1%: ± (1% + 0.05Ω) 5%: ± (2% + 0.05Ω) Values < 1Ω: ± (3% + 0.1Ω) Jumper: Max. 0.1Ω after test	40 ± 2°C, 90%~95% R.H. RCWV or max. working voltage whichever is less for 1000 hours with 1.5 hours "ON" and 0.5 hours "OFF"							

Operating temperature range is -55 to +155°C for all sizes except for 01005 size Operating temperature range for 01005 is -55 to +125°C

Power Derating Curve:

and High-Power Chip Resistor

Repetitive Pulse Information

(This information is for reference only and is not guaranteed performance.)

If repetitive pulses are applied to resistors, pulse wave form must be less than "Pulse Limiting Voltage", "Pulse Limiting Current" or "Pulse Limiting Wattage" calculated by the formula below.

 $Vp = K\sqrt{PxRxT/t}$

 $lp = K\sqrt{P/RxT/t}$

 $Pp = K^2 x P x T/t$

Where: Vp: Pulse limiting voltage (V)

- lp: Pulse limiting current (A)
- Pp: Pulse limiting wattage (W)
- P: Power rating (W)
- R: Nominal resistance (ohm)
- T: Repetitive period (sec)
- t: Pulse duration (sec)
- K: Coefficient by resistors type (refer to below matrix)
- [Vr: Rated Voltage (V), Ir: Rated Current (A)]
- Note 1: If $T > 10 \rightarrow T = 10$ (sec), $T/t > 1000 \rightarrow T/t = 1000$
- Note 2: If T > 10 and T/t > 1000, "Pulse Limiting power (Single pulse) is applied
- Note 3: If Vp < Vr (lp < lr or Pp < P), Vr (lr, P) is Vp (lp, Pp)
- Note 4: Pulse limiting voltage (current, wattage) is applied at less than rated ambient temperature. If ambient temperature is more than the rated temperature (70°C), please decrease power rating according to "Power Derating Curve"
- Note 5: Please assure sufficient margin for use period and conditions for "Pulse Limiting Voltage"
- Note 6: If the pulse waveform is not square wave, please judge after transform the waveform into square wave according to the "Waveform Transformation to Square Wave".

RMCF Coefficient (K) Matrix						
Ohmic Value	К					
R < 10Ω	0.50					
10Ω ≤ R < 100Ω	0.45					
100Ω ≤ R < 1KΩ	0.35					
1KΩ ≤ R < 10KΩ	0.25					
10KΩ ≤ R	0.20					

Waveform Transformation to Square Wave

1. Discharge curve wave with time constant "t" \rightarrow Square wave

2. Damping oscillation wave with time constant of envelope "t" \rightarrow Square wave

3. Half-wave rectification wave \rightarrow Square wave

4. Triangular wave \rightarrow Square wave

5. Special wave \rightarrow Square wave

Recommended Solder Profile

This information is intended as a reference for solder profiles for Stackpole resistive components. These profiles should be compatible with most soldering processes. These are only recommendations. Actual numbers will depend on board density, geometry, packages used, etc., especially those cells labeled with "*".

100% Matte Tin / RoHS Compliant Terminations

Soldering iron recommended temperatures: 330°C to 350°C with minimum duration. Maximum number of reflow cycles is 3.

Wave Soldering								
Description	Maximum	Recommended	Minimum					
Preheat Time	80 seconds	70 seconds	60 seconds					
Temperature Diff.	140°C	120°C	100°C					
Solder Temp.	260°C	250°C	240°C					
Dwell Time at Max	10 seconds	5 seconds	*					
Ramp DN (°C/sec)	N/A	N/A	N/A					

Temperature Diff. = Difference between final preheat stage and soldering stage.

The data provided are for reference only. They are typical performance for this product but are not guaranteed. The actual pulse handling of each individual resistor may vary depending on a variety of factors including resistance tolerance and resistance value. Stackpole Electronics, Inc. assumes no liability for the use of this information. Customers should validate the performance of these products in their applications. Contact Stackpole marketing to discuss specific pulse application requirements.

Resistive Product Solutions

Temperature Measurement of Resistor Surface

Description: The resistor surface generated temperature variation after applied rated voltage. Products and power:

1								
Size	0201	0402	0603	0805	1206	1210	2010	2512
R-V	15K	40.2K	57.6K	180K	182K	100K	100K	75K
Rated Power (W)	1/20	1/16	1/10	1/8	1/4	1/2	3/4	1
Max Rated Voltage (V)	25	50	75	150	200	200	200	200

Test method: Measure component surface temperature directly after the temperature stabilizes.

Test result: As per table below:

The thermal resistance of the RMCP will be similar to the RMCF. For example, the RMCF2512 and the RMCP2512 will have similar surface temperatures at 1W; the RMCP is designed to withstand higher temperatures associated with high power levels.

RoHS Compliance

Stackpole Electronics has joined the worldwide effort to reduce the amount of lead in electronic components and to meet the various regulatory requirements now prevalent, such as the European Union's directive regarding "Restrictions on Hazardous Substances" (RoHS 3). As part of this ongoing program, we periodically update this document with the status regarding the availability of our compliant components. All our standard part numbers are compliant to EU Directive 2011/65/EU of the European Parliament as amended by Directive (EU) 2015/863/EU as regards the list of restricted substances.

RoHS Compliance Status										
Standard Product Series	Description	Package / Termination Type	Standard Series RoHS Compliant	Lead-Free Termination Composition	Lead-Free Mfg. Effective Date (Std Product Series)	Lead-Free Effective Date Code (YY/WW)				
RMCF	General Purpose Thick Film Standard Power Chip Resistor	SMD	YES ⁽¹⁾	100% Matte Sn over Ni	Jan-04 (Japan) Jan-05 (Taiwan, China)	04/01 05/01				
RMCP	General Purpose Thick Film High-Power Chip Resistor	SMD	YES ⁽¹⁾	100% Matte Sn over Ni	Always	Always				

Note (1): RoHS Compliant by means of exemption 7c-1.

"Conflict Metals" Commitment

We at Stackpole Electronics, Inc. are joined with our industry in opposing the use of metals mined in the "conflict region" of the eastern Democratic Republic of the Congo (DRC) in our products. Recognizing that the supply chain for metals used in the electronics industry is very complex, we work closely with our own suppliers to verify to the extent possible that the materials and products we supply do not contain metals sourced from this conflict region. As such, we are in compliance with the requirements of Dodd-Frank Act regarding Conflict Minerals.

Compliance to "REACH"

We certify that all passive components supplied by Stackpole Electronics, Inc. are SVHC (Substances of Very High Concern) free and compliant with the requirements of EU Directive 1907/2006/EC, "The Registration, Evaluation, Authorization and Restriction of Chemicals", otherwise referred to as REACH. Contact us for complete list of REACH Substance Candidate List.

Environmental Policy

It is the policy of Stackpole Electronics, Inc. (SEI) to protect the environment in all localities in which we operate. We continually strive to improve our effect on the environment. We observe all applicable laws and regulations regarding the protection of our environment and all requests related to the environment to which we have agreed. We are committed to the prevention of all forms of pollution.
